

Platz +

Office Furniture Collection

Desk, Manager, Integrated Storage, Meetings

Product Information Sheet

Platz+ is an understatement, designed by John Bennett, to play down its role in the office environment giving way to people and their daily lives as they build the character of the office with their daily tools of work, creating the character by themselves rather than being imposed.

Platz + Desking System

Design Specifications

Platz+ desking system is both light and strong. The structural detailing of the frame and legs create the design language and makes an outstanding feature and strong character of the system. The table frame can be in powder coated finish, satin, polished chrome with a choice of wood finishes constructed using a 25mm thick melamine faced particle board that finishes with 2mm edge bending which gives this setting a feel of serenity, quality and strength.

Platz + Manager

Single and stand-alone furniture elements makes the furniture flexible and easy to use for dedicated needs like the office for a manager or closed office rooms.

- Chemical or Stain Resistance
- Abrasion Resistance

Metal Leg Properties

- Rust & Scratch Resistance
- Treated against corrosion

Awards & Certifications

Green Guard, BIFMA, FSC, PEFC

Warranty

36 months

Platz + Meeting

Meeting rooms have become and taken an ever more important role in the office structure and location for strategic planning. Small tables for the open space or private offices for informal café styled meetings are also available.

Platz + Collective Working

Bench with storage and drawer elements positioned at the end of the bench makes a nice alternative to the traditional use of pedestal storage.

Multipurpose Workspace

A furniture collection for the contemporary environment office and is more about understanding what we do and the way we do it rather than actually designing desks, storage and screens, it's about looking at the daily lives of people working in an office, doing a job and how all that relates to the office structure and community feeling and interaction as a whole. Architects and planners can focus on finding solutions for different ways of working and making people comfortable with their office and the design language allows the furniture to blend into any kind of architecture without being overpowering or becoming the single focus of attention.
